Consent Declaration for the Use of NOA Notes

During our consultation, an AI-supported note-taking tool ("NOA") provided by Jameda GmbH may be used to support documentation.

The tool will only be used if you have given your explicit consent beforehand. The tool records the conversation during the consultation exclusively as an audio file, creates a written transcription from it, and generates a summary to support medical documentation. The purpose of this processing is to enable more efficient and complete documentation of the consultation, so that the treating physician can focus more fully on the conversation with you.

In doing so, special categories of personal data are also processed, in particular health data. The legal basis for this processing is your explicit consent pursuant to Art. 9(2)(a) GDPR.

The audio recordings are stored for a maximum of 72 hours and are then automatically deleted. The transcripts created are stored for a maximum of one year. Your medical documentation is retained independently of this in accordance with statutory retention requirements.

Use of the tool is voluntary. You may withdraw your consent at any time with effect for the future, or request that the tool not be used during the consultation. In this case, you will not suffer any disadvantages regarding your treatment.
